THE VALUE OF CHARCOAL.

Few People Know How Useful It is in Preserving Health and Beauty. Nearly everybody knows that charcoal s the safest and most efficient disinfectant and purifier in nature, but few rea-lize its value when taken into the hu-man system for the same cleansing pur-

at all, but simply absorbs the saces and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking or after enting onlons and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it distintests the mouth and throat from the poison of catarch

All druggists well charcoal in one form or another, but probably the best charcoal and the most for the money is in Stuart's Charcoal Lozenges; they are composed of the finest powdered Willow charcoal, and other harmless antisectics in tablet form, or rather in the form of large, pleasant tasting lozenges, the charcoal being mixed with honey.

The daily use of these lozenges will soon tell in a much-improved condition of the general health, better complexion, sweeter breath and purer blood, and the healty of it is, that no possible harm can result from their continued use, but on the contrary, great benefit.

A Buffale physician in speaking of the benefits of charcoal says: "I advise Stuart's Charcoal Lozenges to all patients suffering from gas in stomach and bowels, and to clear the complexion and purify the breath, mouth and throat, I also believe the liver is greatly benefited by the daily use of them; they cosh ut twenty-five cents a box at drug soors, and slibough in some sense a patent preparation, yet I believe f get more and botter charcoal in Stuart's Charcoal Lozenges than in any of the ordinary charcoal tablets.
